

BIOGRAPHY

Ileana van der Linde

Executive Director

Asset & Wealth Management

Cybersecurity Awareness Global Program Lead

Ileana van der Linde is an Executive Director for J.P. Morgan Asset & Wealth Management (AWM). Ileana leads AWM's Cybersecurity Awareness Program – educating clients and employees globally on how to better protect themselves, their families, and their businesses from increasing cybersecurity threats.

Ileana's team develops timely cybersecurity education materials on various topics to help address the needs of wealthy individuals, family offices, businesses and other centers of influence, so they are better prepared to deal with the reality of cyber threats. She works closely with her colleagues in cyber, fraud prevention, and technology to understand the latest threats, and solutions to mitigate them.

Ileana came to J.P. Morgan with extensive experience in wealth management and technology, having worked on numerous cyber and technology initiatives that impacted High Net Worth and Ultra-High Net Worth clients and their advisors. Throughout Ileana's career of 20+ years, she has always sought to make technology solutions easier to understand for a lay person.

Prior to J.P. Morgan, Ileana worked for Morgan Stanley and Citigroup Private Bank. Prior to a career in financial services, Ileana worked for Hewlett-Packard in Europe.

Ileana has a Bachelors degree from Georgetown University, an MBA from Columbia Business School, and is working on her Masters in Cybersecurity.
